KARTHICKRAJA VELMURUGAN

UI/UX Designer · Product Designer · AI Product Designer

A LITTLE ABOUT ME

I design screens, solve problems, question bad UX, and occasionally fight with Auto Layout.

4+ years designing AI products, enterprise applications, dashboards, and digital experiences — including projects for the Indian Navy's AI organization, INICAI.

I make complicated things look suspiciously simple.

MY DESIGN RULE

If users need a manual, I probably need to redesign it.

THINGS I'M GOOD AT (BESIDES MOVING PIXELS)

Product & UX · Product Thinking · UX Strategy · Research · User Flows · IA

UI & Interaction · Wireframes · Prototypes · Interaction · High-Fi UI · Responsive UI

Design Systems · Components · Patterns · Reusable UI · Dev Handoff

AI Product Design · AI UI · AI Dashboards · AI Chat · AI Workflows · Online & Offline AI

MY DESIGN TOOLBOX

Figma — Where most ideas begin.
Photoshop — Where pixels behave.
Illustrator — Where vectors survive.
After Effects — Where static designs start moving.
Premiere Pro — Where ideas become stories.
DaVinci Resolve — Where videos get their final polish.
Blender / Spline — When 2D isn't enough.
React / HTML / CSS — When design meets reality.

PROFESSIONAL EXPERIENCE
